No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (Operations Staff, P.O. Box 765, Schenectady, New York 12301), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1978 articles are the same as those shown for current articles.

CONTENTS OF VOLUME 88

NUMBER 1, JULY 15, 1978

MASAKI YANAGISHITA AND DAVID RODBARD. Computerized Optimization of Radio-immunoassays for hCG and Estradiol: An Experimental Evaluation	1
C. NIEDERGANG, H. OKAZAKI, AND P. MANDEL. A New Technique for the Isolation and Fluorometric Determination of Polyadenosine Diphosphate Ribose <i>In Vivo</i>	20
S. A. KITCHER, K. SIDDLE, AND J. P. LUZIO. A Method for the Determination of Glucose-6-phosphatase Activity in Rat Liver with [U - ^{14}C]Glucose 6-Phosphate as Substrate	29
PHILIP W. KUCHEL. Discrimination between Steady-State Enzyme Kinetic Functions: An Improved Flow Assay Device Using Fourier Deconvolution	37
TAKAFUMI WATANABE. Application of Sheep Kidney Nuclease to Nucleic Acid Research: Enzymatic Preparation of Deoxy Dinucleotides	62
JEAN WALLACH AND MAXIME HANSS. Binding Constants Determined by Conductivity Titration: Application to Ligand-Nucleases Interaction Studies	69
WILLIAM D. BOSTICK AND BEVERLY S. AUSMUS. Methodologies for the Determination of Adenosine Phosphates	78
G. W. SMITHERS, ANNETTE M. GERO, AND W. J. O'SULLIVAN. A Simple Radioassay for Dihydroorotate Dehydrogenase	93
WALTER F. STAFFORD III. An Externally Adjustable Motor-Driven Rayleigh Slit Assembly for the Analytical Ultracentrifuge	104
CLARK BUBLITZ. A Batch Procedure for the Assay of Cyclic Nucleotide Phosphodiesterase	109
WILLIAM L. BIGBEE, HOWARD B. WEINTRAUB, AND RONALD H. JENSEN. Sensitive Fluorescence Assays for Urokinase Using Synthetic Peptide 4-Methoxy- β -Naphthylamide Substrates	114
HSU-HO CHUNG AND M. J. TRLICA. Combustion and Nonaqueous Titration Determination of Carbon in Plant Tissues	123
K. NARASIMHA RAO AND J. M. NORONHA. A General Method for Characterizing Naturally Occurring Folate Compounds, Illustrated by Characterizing Torula Yeast (<i>Candida utilis</i>) Folates	128
PAUL THOMAS, H. DELINCÉE, AND J. F. DIEHL. Thin-Layer Isoelectric Focusing of Polyphenoloxidase on Sephadex and Its Detection by the Print Technique	138
WILLIAM E. SEIFERT, JR., RAYMOND E. MCKEE, CARL F. BECKNER, AND RICHARD M. CAPRIOLI. Characterization of Mixtures of Dipeptides by Gas Chromatography/Mass Spectrometry	149
COLIN HAGGERTY, EDWARD JABLONSKI, LAUREEN STAV, AND MARLENE DELUCA. Continuous Monitoring of Reactions that Produce NADH and NADPH using Immobilized Luciferase and Oxidoreductases from <i>Beneckea harveyi</i>	162
S. G. RHEE, R. PARK, AND M. WITTENBERGER. New Enzymic Assays for Glutamine Synthetase Adenyltransferase and Its Regulatory Protein P_{IIA}	174
NGA Y. NGUYEN, ALICE G. MCCORMICK, AND ANDREAS CHRAMBACH. An Anodic Drift of pH Gradients in Isoelectric Focusing on Polyacrylamide Gel	186
P. A. FIELDS AND L. H. LARKIN. Polyacrylamide Gel Interference of the Lowry Method for Protein Determination	196
E. LONDON AND G. W. FEIGENSON. A Convenient and Sensitive Fluorescence Assay for Phospholipid Vesicles Using Diphenylhexatriene	203
MICHELE PERRELLA, ADRIANA HEYDA, ANDREA MOSCA, AND LUIGI ROSSI-BERNARDI. Isoelectric Focusing and Electrophoresis at Subzero Temperatures	212
KNUT FELDMANN. New Devices for Flow Dialysis and Ultrafiltration for the Study of Protein-Ligand Interactions	225

RICHARD T. PROFFITT, L. SANKARAN, AND BURTON M. POGELL. Quantitative Estimation of Newly Synthesized Radioactive Proteins: Use of Minicolumns of Antibody Embedded in Agarose Gel or Immobilized on Sepharose	236
H. K. BORYS. A Procedure for Examining the Formation of Radioactive 1-Methyladenine by Starfish Ovarian Tissue	245
KUSOV YURY YURIEVICH AND KALINCHUK NADEŽDA ANDREEVNA. Automated Lowry Method for Microdetermination of Protein in Samples and Effluents Containing Nonionic Detergents	256
LEWIS C. MOKRASCH. Electrophoresis of Membrane Proteins in Concentrated Formic Acid Solutions	263
HÅKAN PERTOFT, TORVARD C. LAURENT, TORGNY LÅÅS, AND LENNART KÅGEDAL. Density Gradients Prepared from Colloidal Silica Particles Coated by Polyvinylpyrrolidone (Percoll)	271
LENA KJELLÉN AND HÅKAN PERTOFT. Density Gradients Prepared from Colloidal Silica Particles Coated by Polyvinylpyrrolidone (Percoll). II. Radioactive Labeling of Percoll	283
ANNICK LE DUR, RICHARD CHABY, AND LADISLAS SZABÓ. Colorimetric Estimation of Ethanolamine with <i>p</i> -Benzoquinone in the Nanomole Range	285
G. A. KOCHETOV, R. A. USMANOV, AND A. T. MEVKH. A New Method of Determination of Transketolase Activity by Asymmetric Synthesis Reaction	296
JONAS BLOMBERG. Acetylation Analysis of Saccharides. 2. Microanalysis of Neutral Glycosphingolipids by Means of Acetylation with Radioactive Acetic Anhydride	302
JOSEPH L. ROOSEMONT. Reaction of Histidine Residues in Proteins with Diethylpyrocarbonate: Differential Molar Absorptivities and Reactivities	314

SHORT COMMUNICATIONS

TOMASZ HAERTLÉ AND JACEK AUGUSTYNIAK. Increased Scintillation Counting of ³ H-Amino Acids Bound to Transfer RNA	321
DIANE M. HANDCOCK, PATRICIA L. CHANG, AND RONALD G. DAVIDSON. The Use of Fluorogenic Substrates to Locate Rapidly Enzyme Activity in Chromatographic Fractions	327
S. GURUSIDDAIAH AND B. A. MCFADDEN. Cleansing Ninhydrin Reaction Coils in Automatic Amino Acid Analyzers	332
GEOFFREY WEBB. Multiple Fraction Collection Using a Peristaltic Pump and a Fraction Collector Modified for Multiple Channel Operation	334
R. K. ELLSWORTH AND M. E. ST. PIERRE. Enzymatic Preparation of [³ H]NADH	338
CLAIRE COOKSON. Interference of Zwitterionic Biological Buffers with the Lowry Method of Protein Determination	340
MICHAEL R. SUTTON AND RALPH A. BRADSHAW. Identification of Dansyl Dipeptides in the Dansyl-Edman Peptide Degradation	344

NUMBER 2, AUGUST 1, 1978

S. TSUYOSHI OHNISHI AND ROBERT S. GALL. Characterization of the Catalyzed Phosphate Assay	347
CHAU-TE OU, ISAMU MATSUMOTO, JURI ROZHIN, AND T. T. TCHEN. Enzyme Assay in Cultures of <i>Escherichia coli</i> by a Continuous Flow Method Based on Lysis from Without by a Phage Ghost	357
HÉLÈNE RICHARD-FOY, GÉRARD REDEUILH, AND ROBERT RICHARD-FOY. A Simple, Rapid, and Precise Method for Calculating the Steroid Hormone-Receptor Complex Concentration in the Presence of Saturating Levels of Hormone by Using "Differential Dissociation" Techniques	367

TAKESHI KATAYAMA, KEN-ICHI TAKAI, REIKO KARIYAMA, AND YASUHIRO KANEMASA. Colloid Titration of Heparin Using Cat-Floc (Polydiallyldimethyl Ammonium Chloride) as Standard Polycation	382
CHRISTIAN KRÜGER AND KO POLLON. A Preparative and Analytical Microscale Procedure for Nonhistone Chromosomal Proteins	388
MICHEL DUGUET, MARCEL MÉCHALI, AND JEAN-MICHEL ROSSIGNOL. A Rapid Technique to Separate DNA Polymerase- α and - β Activity from a Cytosol Extract	399
JEROME L. MADERDRUT. Some Radiometric Microassays for Butyrylcholinesterase ...	406
DINAH S. SEIDL, WERNER G. JAFFÉ, EGLIS GONZÁLEZ, AND ANTONIO CALLEJAS. Microelectrophoretic Method for the Detection of Proteinase Inhibitors	417
SHANMUGA G. SUNDARAM, K. M. MOHAMED SHAKIR, AND SIMEON MARGOLIS. Preparative Isoelectric Focusing of Human Serum Very Low-Density and Low-Density Lipoproteins	425
GARY GRAHAM, RODNEY S. NAIRN, AND GEORGE W. BATES. Polyacrylamide Gel Staining With Fe ²⁺ -Bathophenanthroline Sulfonate	434
OYIN SOMORIN. Cholinesterase Assay by Gas-Solid Chromatography	442
T. J. SPRINKLE, M. E. ZARUBA, AND G. M. MCKHANN. Radioactive Measurement of 2',3'-Cyclic Nucleotide 3'-Phosphodiesterase Activity in the Central and Peripheral Nervous System and in Extraneural Tissue	449
LEIF HOLMQUIST, KERSTIN CARLSON, AND LARS A. CARLSON. Comparison Between the Use of Isopropanol and Tetramethylurea for the Solubilisation and Quantitation of Human Serum Very Low Density Apolipoproteins	457

KAZUO SUZUKI. <i>trans</i> -Cinnamic Acid 4-Hydroxylase of <i>Phaseolus mungo</i> . A New Assay Method	468
PAUL C. ENGEL AND JANET B. JONES. Causes and Elimination of Erratic Blanks in Enzymatic Metabolite Assays Involving the use of NAD ⁺ in Alkaline Hydrazine Buffers: Improved Conditions for the Assay of L-Glutamate, L-Lactate, and Other Metabolites	475
JEROME L. HOJNACKI, ROBERT J. NICOLosi, GAYLE HOOVER, NORMA LLANSA, ABBY G. ERSHOW, MOHAMED EL LOZY, AND K. C. HAYES. Comparison of Two Ultracentrifugation Procedures for Separation of Nonhuman Primate Lipoproteins	485
F. F. FARRIS, E. O. MAGARIAN, AND F. O. SLININGER. A Microassay for the Determination of Monoamine Oxidase Activity Using Electron Capture Gas Chromatography	495
CHARLES S. G. PUGH, RONALD T. BORCHARDT, AND HENRY O. STONE. Simultaneous Assay for mRNA(Guanine-7)-methyltransferase and mRNA(2'- <i>O</i> -nucleoside)-methyltransferase of Purified Vaccinia (WR) Virions	504
JOHN W. VIETS, WILLIAM M. DEEN, JULIA L. TROY, AND BARRY M. BRENNER. Determination of Serum Protein Concentration in Nanoliter Blood Samples Using Fluorescamine or <i>o</i> -Phthalaldehyde	513
PHILIP REYES AND RICHARD B. SANDQUIST. Purification of Orotate Phosphoribosyltransferase and Orotidylate Decarboxylase by Affinity Chromatography on Sepharose Dye Derivatives	522
P. NIEUWENHUYSEN, E. DE HERDT, AND J. CLAUWAERT. Ribonucleic Acid and Protein Content of Eukaryotic Ribosomes Isolated from <i>Artemia salina</i>	532
W. K. SARTORY AND H. B. HALSALL. Design of a Generalized <i>n</i> -Solute Mixing-Chamber Gradient Generator	539
KÅRE JULSHAMN, KNUT-JAN ANDERSEN, YNGVAR WILLASSEN, AND OLAF R. BRAEKKAN. A Routine Method for the Determination of Aluminium in Human	

Tissue Samples Using Standard Addition and Graphite Furnace Atomic Absorption Spectrophotometry	552
J. A. MILNER AND E. G. PERKINS. Determination of Uric Acid in Biological Fluids By High-Pressure Liquid Chromatography	560
STEVEN MICKO AND WILLIAM W. SCHLAEPFER. Metachromasy of Peripheral Nerve Collagen on Polyacrylamide Gels Stained with Coomassie Brilliant Blue R 250	566
ANA SAVIC AND DOMINIC POCCIA. Separation of Histones from Contaminating Ribosomal Proteins by Two-Dimensional Gel Electrophoresis	573
OSAMU SUZUKI AND KUNIO YAGI. A Nonisotopic Assay for Acetylserotonin Methyltransferase	580
JIANN-TRZUO LIN, SLOBODAN MILUTINOVIC, AND FALK FAHRENHOLZ. Preparation and Characterization of Biologically Active Iodo- and (³ H)Secretin	587
LEIGH C. WARD. A Ninhydrin-Orthophthalaldehyde Reagent for the Determination of N ⁷ -Methylhistidine	598
R. FLORES. A Rapid and Reproducible Assay for Quantitative Estimation of Proteins Using Bromophenol Blue	605
DIANE D. BEAL AND GEORGE T. BRYAN. Method for Detection of 2-Azahypoxanthine in Human and Rat Urine	612
JOHN L. YOUNG AND BRIAN A. WEBB. Two Methods for the Separation of Human α -Fetoprotein and Albumin. (A) Affinity Chromatography Using Blue Sepharose CL-6B and (B) Ampholyte Displacement Chromatography	619
BERNADETTE BLAZY, MICHEL BARDET, AND ALAIN BAUDRAS. A Standard High-Yield Purification of L-(+)-Lactate: Cytochrome c Oxidoreductase (Cytochrome b ₂) from the Yeast <i>Hansenula anomala</i>	624
ALBERT HIMOE AND ROBERT W. RINNE. Separation of Citrate, Malate, Aspartate, and Glutamate in Crude Extracts by One-Dimensional Ion Exchange Thin-Layer Chromatography	634
CHIA-LING HU, GEORGE CROMBIE, AND CARL FRANZBLAU. A New Assay for Collagenolytic Activity	638
DANIEL S. H. LIU, GLENN HILTIBRAN, THOMAS CASTLE, AND ARLAN RICHARDSON. Comparison of the Extraction of RNA from Rat Liver by the Diethyl Pyrocarbonate-Sodium Dodecyl Sulfate and Phenol-Chloroform Methods	644
HANS-JÖRG ZEITLER. N-Methyl-2-anilino-6-naphthalenesulfonyl Hydrazine (2,6-Mansyl Hydrazine). A New Sensitive Fluorometric Reagent for Carbonyl Compounds	649
DONNA PAYNE-BOSE, ASEGASH TSEGAYE, R. D. MORRISON AND G. R. WALLER. An Improved Method for Determining Breath H ₂ as an Indicator of Carbohydrate Malabsorption	659
RICHARD G. MORAN AND WILLIAM C. WERKHEISER. A Borate Column for the Separation of Ribo and Deoxyribonucleosides	668
MARC E. GOLDYNE AND SVEN HAMMARSTRÖM. Quantitative Determination of Prostaglandins E ₁ and F _{1α} by Multiple Ion Analysis	675
PAUL CHRISTNER, GEORGE WEINBAUM, BRUCE SLOAN, AND JOEL ROSENBLOOM. Degradation of Tropoelastin by Proteases	682

SHORT COMMUNICATIONS

CARL D. PFAFFENBERGER AND EVAN C. HORNING. Additional Data Supporting Sex Differences in Human Urinary Steroid Metabolic Profiles	689
CHRISTOPHER WATTERS. A One-Step Biuret Assay for Protein in the Presence of Detergent	695
AUTHOR INDEX FOR VOLUME 88	699
The Subject Index for Volume 88 will appear in the December 1978 issue as part of a cumulative index for the year 1978.	

INFORMATION FOR AUTHORS

Analytical Biochemistry will publish articles of broad interest on qualitative and quantitative techniques based on chemical, physical, and biological principles; methods of preparation, purification, characterization, isolation, and separation of biological substances and related materials; and instrumentation.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Analytical Biochemistry* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Address. Manuscripts should be submitted to **Analytical Biochemistry, Editorial Office, 111 Fifth Avenue, New York, N. Y. 10003.**

Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. At least three copies should be submitted, each copy to include all figures and tables. The original copy must be typewritten, double-spaced, on one side of white bond paper, about $8\frac{1}{2} \times 11$ inches in size, with one-inch margins on all sides. Each manuscript should have a separate title page noting title of article, authors' names (without degrees), a running title (not exceeding 35 letters and spaces), an abstract (50–150 words), and address to which proof should be mailed. Please number all pages of manuscript.

Authors are encouraged to use descriptive subheadings in this order: Abstract, Introductory statement (no heading), Methods, Results, Discussion, Acknowledgments, and References.

Units of weights, measures, etc., when used in conjunction with numerals should be abbreviated and unpunctuated (e.g., 10%, 50 ml, 3 g, 8 cm).

Names of chemical or organic substances should follow the recommendations of the IUPAC–IUB Combined Commission on Biochemical Nomenclature (CBN) as published in the *Archives of Biochemistry and Biophysics* Information for Authors, appearing in the January issues of that journal.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described; if an accepted code of practice has been followed, a reference to the relevant standards should be given.

Figures should be numbered consecutively with Arabic numerals in order of mention in the text; each figure should have a descriptive legend. Legends should be typed together on a separate sheet, double-spaced. All illustrations should be in finished form ready for the engraver. A convenient size for drawings is $8\frac{1}{2} \times 11$ inches (21×27.5 cm). Drawings should be made with India ink on tracing linen, smooth surface white paper, or Bristol board. Graph paper if used should be ruled in blue. Grid lines that are to show in the final engraving should be inked in black.

Photographs must be kept to a minimum and should be glossy prints with strong contrasts; the magnification should be indicated by a scale where possible.

Tables should be typed on separate pages, numbered consecutively with Arabic numerals in order of mention in the text. All tables should have descriptive headings, typed (double-spaced) above the table.

Footnotes should be designated in text by superscript numbers and listed on a separate sheet; in tables, by superscript letters and placed at bottom of page containing table.

References to the literature should be cited in the text by Arabic numerals in parentheses and listed at the end of the paper in consecutive order. Abbreviations of journal titles should

follow the style used in Chemical Abstracts' *Service Source Index* (1969 Edition). Please note style of capitalization and punctuation for journal articles and edited books in the following examples:

1. Chatteraj, D. K., and Bull, H. B. (1971) *Arch. Biochem. Biophys.* **142**, 363-370.
2. Gottschalk, A. (1960) in *The Enzymes* (Boyer, R. D., Lardy, H. A., and Myrback, K., eds.), 2nd ed., Vol. 2, pp. 461-467, Academic Press, New York.
3. Meister, A. (1957) *The Biochemistry of Amino Acids*, p. 298, Academic Press, New York.

Proofs. Galley proofs will be sent to the authors with reprint order forms. Fifty reprints of each article are provided free of charge.
